

Local Partnerships

Why create a Partnership?

1. They can help with delivery of the project and dissemination of the results
2. They may have existing financial tools or grant schemes, which could be utilised
3. They may have access to networks, and support organisations
4. The project can gain national and international recognition
5. It prevents duplication of work, resources and time
6. In the case of Eco n'Home, partnerships with energy utilities were created to help stimulate the White Certificate market.
